one of the main reasons we bought XM radio is because my husband is an long distance truck driver and he needs to know up to the minute wheater and traffic reports in the states he's in... sure he could try and tune into the local channels and see whats going on, but then he's putting him self and other at risk trying to find an channel that wil tune in.. with xm he's on the same channel all the time and doesn't have to fiddle with th dials and buttons of his regular radio... and another reason we bought it, is because he's not always driving his truck some times he's in someone elses and their radio doesn't work so he still wouldn't be able to hear whats going on...

I personaly have an cheap heart i don't like to pay for something you can get for free, but in this case we have gotten our money worth over and over again...

thank you

Mrs. Gillott and Husband...
